

## Wire drive rolls

Migatronik has a wide range of wire drive rolls for various types of MIG/MAG welding.

However, some customers might have a need for wire drive rolls for heavy-duty load e.g. automation solutions, welding in thick materials. We recommend these customers to use drive rolls with bearings in order to increase the life-time of wear parts:

- 72200300 Wire drive roll 0.8 V-groove w/bearing
- 72200301 Wire drive roll 1.0 V-groove w/bearing
- 72200303 Wire drive roll 1.2 V-groove w/bearing
- 72200305 Wire drive roll 1.2 U-groove w/bearing
- 72200308 Wire drive roll 1.6 U-groove w/bearing
- 72200310 Wire drive roll 2.0 U-groove w/bearing
- 72200314 Wire drive roll 1.4 V-groove w/bearing
- 72200315 Wire drive roll 1.6 V-groove w/bearing
- 72200320 Wire drive roll smooth w/bearing

The upper picture shows traditional wire drive roll to the left and wire drive roll with bearing to the right:

### 78811404 RWF<sup>2</sup>

- 25650201 Wire drive roll 0.8-1.0 V-groove
- 25650202 Wire drive roll 1.0-1.2 V-groove
- 25650203 Wire drive roll 1.2-1.6 V-groove
- 25650204 Wire drive roll 0.8-1.0 U.groove
- 25650205 Wire drive roll 1.0-1.2 U-groove
- 25650206 Wire drive roll 1.2-1.6 U-groove

### Migalube - 99150000

#### UK

Dirt-proof, dust-proof and water-resistant dry lubricant for cleaning of Migatronik plastic feed rolls. The lubricant provides a protective non-drip coating that minimizes wear of the movable parts.

#### DE

Wasserfester Festschmierstoff zur Reinigung von Migatronik Kunststoff-Drahtrollen. Der Schmierstoff gibt eine tropffreie Schutzschicht, die den Verschleiß der beweglichen Teile minimiert. Der Schmierstoff ist schmutz- und staubabweisend.

#### DK

Vandfast tørsmøringsmiddel til rensning af Migatronik plasttrisser. Smøremidlet giver en meget holdbar drypfri smøringsfilm, der minimerer slitage i de bevægelige dele. Smøremidlet afviser snavs, støv og slibemidler.
